

Experiential Education & the Experiential Learning Cycle

The tie between youth development and experiential education:

- Youth become actively involved.
- Youth have the ability to take leadership roles and make decisions.
- Youth have the opportunity to practice and apply newly learned skills/knowledge.

Basic premises of experiential education in a youth development environment:

- Youth are partners in the learning process; rather than being lectured at, they become engaged participants.
- The role of the adult is to guide the process and create a learning environment.

David Kolb's Experiential Learning Cycle
